

2022 BEBA Annual Report

During the year 2022 BEBA continued supporting families within person sessions at the Ojai clinic in California as well as with Zoom or phone sessions for families in other areas of the country and the world. Families attend sessions for as long as they want/need to resolve issues and traumatic imprinting and to explore effective parenting skills so they can continue on their own with occasional support.

Beba Research Project

During this year we published the book on the research done about the BEBA clinic. This was a retrospective study to determine how coming to BEBA had affected the 254 families involved in the program up until the beginning of the study in 2020. The study included an online questionnaire and personal interviews that provided a wealth of data to research these issues and educate the professional and public sectors about our findings. The study was completed in the Fall 2021. The research became a 222-page document that is now available to distribute to BEBA families, graduates of the Castellino training and supporters as a PDF at a very low cost at our website (If you are interested please visit our website at:

The book is also available for sale at Amazon (put the link).

During this year Susan Highsmith and Tara Blasco presented the book at different online platforms.
